

WHAT IS CLAIMED IS:

1. A method of providing medical testing comprising:

providing central serving apparatus coupled to the Internet;

uploading medical test measurement data to said central server from remote locations

5 via patient Internet apparatus via the Internet;

selecting a computer program algorithm at said central serving apparatus to process  
said medical test measurement data;

processing said medical test measurement data in accordance with said selected  
computer program algorithm to produce test information from said medical test measurement  
10 data; and

downloading said test information to predetermined user apparatus coupled to the  
Internet.

2. A method in accordance with claim 1, comprising:

providing a data base accessible by said central server; and

15 storing said test information in said database.

3. A method in accordance with claim 1, comprising:

receiving patient identification information for said test measurement data;

storing said test information in a data base; and

associating said stored test information with said patient identification information.

20 4. A method in accordance with claim 3, comprising:

receiving a request for said test information from a requester; and

determining that said requester has authorization to obtain said information.

5. A method in accordance with claim 4, comprising:

receiving said request via the Internet.

6. A method in accordance with claim 4, comprising:

downloading said requested test information to said requester via the Internet.

7. A method in accordance with claim 3, comprising:

5 receiving a request for said test information from a requester that has no authorization to obtain information;

determining that said requester has no authorization; and

rejecting said request.

8. A method in accordance with claim 1, comprising:

10 receiving a request via the Internet for testing from patient Internet apparatus; and

downloading via the Internet said test measurement software to said subject Internet apparatus.

9. A method in accordance with claim 8, comprising:

15 storing said test measurement software in memory located proximate said central server.

10. A method in accordance with claim 8, comprising:

downloading automatic un-install software with said test measurement software.

11. A method in accordance with claim 10, comprising:

20 un-installing said test measurement software after uploading said test measurement data.

12. A method in accordance with claim 8, comprising:

un-installing said test measurement software after uploading said test measurement data.

downloading testing information to said patient Internet apparatus.

14. A method in accordance with claim 13, comprising:

5

15. A method in accordance with claim 13, comprising:

providing said testing information as multimedia information displayable at said patient

### Internet apparatus.
